

Values, attitudes and behaviours are essential to good leadership. This is what the six leadership capabilities focus on.

Each capability is described across three **stages of progression**. These will help you to recognise that your leadership capabilities are developing and provide evidence to support this. The stages of progression are cumulative so to be at the accomplished stage you should aim to demonstrate evidence of the emerging, established and accomplished stages. The stages of progression are not related to tiers within an organisation. You do not need to be in a senior management role to demonstrate accomplished leadership.

**Emerging** leadership is about demonstrating leadership potential.

**Established** leadership can be consistently demonstrated in practice.

**Accomplished** leadership is about providing a model of good leadership to which others can aspire.

For each stage of progression there are **indicators** which suggest some ways you could evidence the leadership capability at this stage. Each line of indicators has a theme which is described in the column on the left. The indicators are a guide and the type of evidence you might use will depend very much on your role and your level of management. For example, as a first line manager much of your evidence might be drawn from your work with your team and the people they support while as a senior manager you might expect to obtain evidence at a more strategic level.

## Links to the Continuous Learning Framework

The Continuous Learning Framework (CLF) has thirteen personal capabilities which focus on how social service workers manage themselves and their relationship with others in the workplace. There are many links between these and the leadership capabilities. Some of the following indicators for the leadership capabilities have been taken from the CLF, sometimes with some minor changes to the wording to align with other leadership capability indicators. If the indicator comes from the CLF, it will show in brackets underneath which personal capability of the CLF it has come from.
